

Greetings,

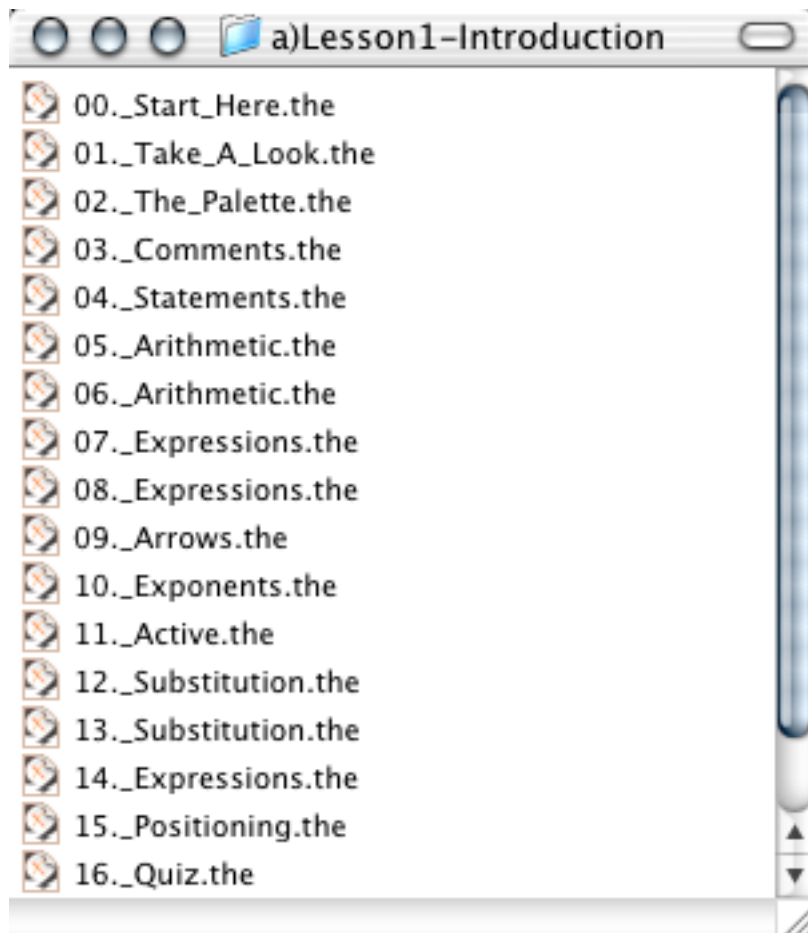

This lesson is an introduction to LiveMath.

It assumes you have LiveMath installed and nothing more, except that you would like to know more. You will.

This lesson contains fifteen LiveMath notebooks that will introduce you to the very basic structure and functionality of LiveMath.....the very basic.

Later Lessons will use the skills you develop here to investigate what LiveMath can really do. [The goal of this lesson is to make you feel comfortable interacting with LiveMath.](#) When you are finished with this lesson you should feel that you can go onto the next lesson.

The notebooks are numbered as you should read them. You can open these by double clicking on their icons.

The lesson winds up with a quick quiz. Use it to ask yourself how you feel about LiveMath so far. Enjoy the lesson.
