

Greetings,

This lesson is about carrying out Algebraic operations with LiveMath. It assumes you have either gone through Lessons 1, 2, and 3 and understand their material.

This lesson contains thirteen LiveMath notebooks that will discuss algebraic operations - basically, the "COMPUTE" section of the palette.

The goal of this lesson is get you feeling comfortable with performing algebraic operations like substitution, factoring, and more. When you are finished with this lesson you should feel that you can open up a blank notebook in LiveMath and start creating and exploring on your own.

The notebooks are numbered as you should read them. You can open these by double clicking on their icons.

The lesson winds up with a quick quiz. Use it to ask yourself how you feel about LiveMath so far. Enjoy the lesson.
