

**Getting More Help**

**Examples Menu**

- There is an Examples Menu. Take a look. All kinds of examples. They include step-by-step explanations and pictures. Not only that, but the examples perform the example live in the notebook for you.

**AskSally**

- There is a huge searchable help system called AskSally. You can find it on your LiveMath CD or on our website:
[http://www.livemath.com/ asksally/](http://www.livemath.com/asksally/)

AskSally contains step-by-step instructions, movies, example code, and examples.

**Starter Library**

- Select Starter Library from the File Menu. The full installation of LiveMath has a collection of over 1,000 notebooks for you to use and learn from.

**LiveMath Courses**

- We hope the JumpStart lessons have gotten you off the ground and ready to learn more. Jump Start was intended to get you up and running, prepare you to experiment and investigate on your own, and to give you a push towards creating your own mathematics.

Visit the LiveMath website for information on more indepth courses covering LiveMath operation and using LiveMath in the classroom to help students learn math.
